GLEN DEE BENEFITS

- Floricane
- Excellent shelf life – firm fruit, good integrity

Glen Dee berry is a large fruit, with a creamy, custard texture, vanilla notes and a perfect balance of sweetness and acidity. The shelf life is superb and it maintains a uniform appearance and firmness, even in storage.

Glen Dee is known for its large, bright, pale berries and low harvesting costs. It is a spine free, upright variety which bridges the gap between mid-season and early autumn fruit.

- Sweet raspberry flavour with acid bite and creamy texture
- Consistently large fruit

Described by one grower as, ‘a grower’s variety’, Glen Dee is noted as giving a consistently high yield of large, heavy and firm fruit which gets the tonnes up quickly. It comes off the plug easily, does well in Scottish soils, has good field tolerance to root rot and requires less input than other varieties. Picking costs are reported to be less than other varieties too - up to as much as 20% by some comparisons. A much higher percentage of first class fruit also brings costs down and gives a higher return.

GLEN DEE OVERVIEW

Pest and Disease

Glen Dee carries the A10 gene, conferring resistance to most biotypes of the large raspberry aphid (*Amphorophora idaei*)

Seasonality

Mid to late season

Flavour

Sweet raspberry flavour supported by independent sensory testing

Fruit Size

Consistently large and fruit shape is conical

Firmness

Firm with good integrity

Fruit Colour

Bright berries

Yield

Plants are consistently productive compared with commercial cultivars at James Hutton Institute

Post-harvest shelf life

Outstanding shelf-life
Uniform appearance and firmness of berries in storage ensure that Glen Dee is delivered in optimum condition

GLEN DEE OVERVIEW

Market

- 🍷 Glen Dee is a versatile florican raspberry variety
- 🍷 It is very well adapted to the processing market where its concentrated ripening, ease of removal from the plant and fruit quality make it an ideal varietal choice in specific locations
- 🍷 Berries of Glen Dee raspberry can also be harvested and marketed into the fresh sector

Offer

- 🍷 Global Plant Genetics is the exclusive license holder in a range of international territories.
- 🍷 See last page for details of international sub-licensees
- 🍷 If you are located in other territories, please make contact directly with Global Plant Genetics with your enquiry

GLEN DEE REVIEW

“Glen Dee is a grower’s variety. Large, heavy, firm fruits get the tonnes up quickly! Easy picking and packing with an excellent shelf-life and sweet raspberry flavour. The whole farm has a spring in their step on Glen Dee harvest days!”

James Hutton Limited
